### Section A

### Section B
ADDITIONAL MATERIALS

You will need basic drawing equipment, coloured pencils and a calculator for this examination.

INSTRUCTIONS TO CANDIDATES

Use black ink, black ball-point pen or your usual method.

Write your name, centre number and candidate number in the spaces provided on the front cover.

Answer ALL questions.

Write your answers in the spaces provided in this booklet. Where the space is not sufficient for your answer, continue at the back of the book, taking care to number the continuation correctly.

You are reminded of the necessity for good English and orderly presentation in your answers.

INFORMATION FOR CANDIDATES

The number of marks is given in brackets at the end of each question or part-question.
Closed box

Open box, with internal colour images

Card inlay

Box net
1. This question is about Product Analysis. It is worth a total of 15 marks.

The photographs opposite show details of a box for a mail order healthy eating company. The questions that follow are about the box.

- The box is available in one size.
- The box contains four healthy snacks that are held in place by the card inlay.
- The box is printed on both sides, a full colour image on the inside.
- The structure is completely glueless.
(a) (i) Complete the table below to give the reasons for the specification point. [2]

The first specification point has been done for you.

<table>
<thead>
<tr>
<th>SPECIFICATION POINT</th>
<th>REASONS</th>
</tr>
</thead>
<tbody>
<tr>
<td>The box size must be 245mm x 165mm x 25mm.</td>
<td>The box size allows enough space for the contents to be packaged comfortably without being squashed, whilst not wasting too much excess material.</td>
</tr>
<tr>
<td>The box material must be 280 gsm.</td>
<td></td>
</tr>
</tbody>
</table>

Give TWO reasons why the card inlay is made from a smaller gsm material than the box. [2]

Reason 1: 

Reason 2: 
<table>
<thead>
<tr>
<th>MATERIAL</th>
<th>GLASSINE PAPER</th>
<th>NON-RECYCLED BLEACHED DUPLEX PAPERBOARD.</th>
</tr>
</thead>
</table>
| Properties | • Strong and durable yet light.  
• Can be printed on one side.  
• Easy to fold and glue.  
• Greaseproof and resistant to water at first.  
• Loses resistance to water easily and quickly. | • Strong and durable.  
• Available in a variety of different weights.  
• Can be printed on both sides.  
• One side is duller than the other.  
• It is safe to come into contact with food. |
1(b) Study the information in the table opposite and state what is the best material to use for the box.

(i) Name of the material: [1]

(ii) Explain why the boxes are NOT made from recycled material. [2]
1(b) (iii) Explain why the company use glueless nets for their boxes. [2]
1(c) The mail order company includes paper based advertising with nutritional information and some accessories in their snack box.

Personalised welcome booklet including nutritional information and vouchers.

Paper napkin which is part of an accessories pack.

Explain why it is important for the company to include such items in their boxes. [3]
SPECIAL OFFER!

- Your first box half of the original price
- Your next 2 boxes for $3/4 of the full price
- Your other boxes cost £3.80 (full price)

over 100 snacks, each with a healthy benefit
every box made especially for you
delivered to your work or home
The advert opposite shows the company’s special offer that attempts to attract potential customers into purchasing their product. The questions that follow are about the advert.

(i) State how much the first box would cost. [1]

(ii) Calculate the total cost of 7 boxes. [2]

(Show all your workings.)
2. This question is about the general issues of Design & Technology. It is worth a total of 10 marks.

(a) Before designing a product, designers will assess the environmental impact of a product.

(i) State the name of that process illustrated below. [3]

L ______ C ______ A ______
The Committee for European Standardisation (CEN) sets standards and technical specifications for products made and sold in Europe.

Name TWO organisations that the CEN work closely alongside. [2]

Name 1: ________________________________

Name 2: ________________________________
2(b) The following symbols are often used on graphic products.

Explain how these symbols have encouraged consumers to think about sustainable and environmental issues. [2]
2(c) The Packaging (Essential Requirements) Regulations 2003, are a set of criteria that affect how designers think about packaging and packaging design.

List THREE areas of packaging design that are affected by the regulations. [3]

1. 

2. 

3. 

3. This question is about the designers that you have studied. It is worth a total of 10 marks.

During your course you have studied the work of Neville Brody and David Carson.

(a) Complete the facts that relate to each designer. [2]

<table>
<thead>
<tr>
<th>Neville Brody</th>
<th>Created the font named</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
</tr>
<tr>
<td>David Carson</td>
<td>Worked as artistic director of the magazine named</td>
</tr>
<tr>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
</tr>
</tbody>
</table>

3(b) Write a short essay identifying and describing the impact that EITHER David Carson OR Neville Brody has had on the world of design. [8] Marks will be awarded for the content of the answer and the quality of written communication.
<table>
<thead>
<tr>
<th>PROCESS</th>
<th>DESCRIPTION</th>

</tr>
</tbody>
</table>
4. This question is about the Design Process and how it is used. It is worth a total of 25 marks.

(a) (i) Using words from the list below, complete the table opposite to match the stages of the design process with their description. [4]

| Specification | Evaluation | Design Brief | Planning | Development |

(ii) State the name of the activity that involves a designer finding out what customers require in a product. [1]
4(b) Explain why it is important to plan the manufacture of products carefully. [3]
State the innovative finishing process that is to be used on the front of your pop-up card.
A greeting card company is releasing a range of pop-up cards. They have asked you to design a prototype card for their consideration.

The company states that:

- your card must be a pop-up birthday card for a child aged 4-6;

- your design should suit the stated target audience.

Design your FRONT cover in the space provided opposite.

MARKS WILL BE AWARDED FOR:

(i) an interesting, full colour design for the front of the pop-up card; [4]

(ii) using an innovative finishing process to the front of the pop-up card. [1]
4(c) Draw your design for the INSIDE of the pop-up card in the space provided opposite.

MARKS WILL BE AWARDED FOR:

(iii) an innovative solution for the INSIDE of your pop-up card; [3]

(iv) a fully detailed annotated sketch of the pop-up mechanism; [5]

(v) the quality of the drawing and presentation. [4]
<table>
<thead>
<tr>
<th>PROCESS</th>
<th>NAME</th>
</tr>
</thead>
<tbody>
<tr>
<td>The process that allows for parts of the design to be sunken into the surface of the material.</td>
<td></td>
</tr>
<tr>
<td>The process that allows part of the design to have a gloss finish whilst leaving the remainder matt.</td>
<td></td>
</tr>
<tr>
<td>The process that allows part of the material to be removed.</td>
<td></td>
</tr>
</tbody>
</table>
5. This question is about Commercial Manufacturing Processes. It is worth a total of 10 marks.

(a) (i) Name the THREE stages in commercial printing. [3]

Stage 1: ________________________________

Stage 2: ________________________________

Stage 3: ________________________________

(ii) Complete the table opposite by stating the correct name for EACH process 3 × [1]
5(b) Explain how the following symbols and marks are used on printed graphics.

Registration Marks

(i)  

_________________________________________________________________

_________________________________________________________________

_________________________________________________________________

_________________________________________________________________

_________________________________________________________________

[2]
Colour Bars showing CMYK %

5(b) (ii) 

[2]
6. This question is about Materials and Components. It is worth a total of 15 marks.

(a) List the following paper sizes in order from smallest to largest. [3]

A6          A0          A2

Smallest: __________________________________________

Largest: __________________________________________

(b) (i) State the name of the colour scheme illustrated by the colour wheels opposite. [1]

Colour scheme:
6(b)  (ii) On the opposite page place a TICK (√) in the box under the illustration that best represents a colour gamut.  [1]

(iii) Colour systems can be either additive or subtractive. Describe the difference between an additive colour system and a subtractive colour system.  [3]
<table>
<thead>
<tr>
<th>MATERIAL</th>
<th>DESCRIPTION</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Scented and aromatic oils are embedded into labels, plastic or printing ink that release scent. Some technologies require touch for the scent to be released.</td>
</tr>
<tr>
<td></td>
<td>A laminated material that allows the consumer to identify if the material has been damaged. A visible change to the layers will indicate if the package or the contents have been interfered with.</td>
</tr>
</tbody>
</table>
6(c) (i) Using the list below, match the correct material to each description to complete the table opposite. 2 × [1]

Olfactory Packaging
Slow Release Patch
Tamper-Indicating Wrapper

(ii) Explain what you understand by the term ‘composite materials’. [2]
Describe the difference between legible and readable text. [3]

<table>
<thead>
<tr>
<th>LEGIBLE TEXT</th>
<th>READABLE TEXT</th>
</tr>
</thead>
<tbody>
<tr>
<td>This is an example of legible text. There are many differences between the legibility and readability of words.</td>
<td>This is an example of readable text. There are many differences between the legibility and readability of words.</td>
</tr>
<tr>
<td>TOOL/EQUIPMENT</td>
<td>SAFETY FEATURE</td>
</tr>
<tr>
<td>-----------------------------</td>
<td>----------------</td>
</tr>
<tr>

<td>[2]</td>
</tr>
<tr>
<td>Cutting mat.</td>
<td>[2]</td>
</tr>
</tbody>
</table>
7. This question is about Tools, Equipment and Making. It is worth a total of 20 marks.

(a) Name the shape that the tool illustrated helps designers make. [1]

Shape: ____________________________________________

(b) (i) Complete the table opposite by describing the safety feature of EACH of the tools/equipment shown.
7(b) (ii) The statements listed show the different stages in the production of the leaflet shown opposite.
Complete the flowchart by placing the stages into the correct order. [6]

(c) (i) State the function of the following tools when used in CAD packages. 3 × [1]
7(c) (ii) Explain how adjusting the shutter speed on a digital SLR camera can help designers create different images. [2]

(iii) Explain the meaning of the term duplex when related to graphic products. [2]
8. This question is about ICT, CAD, CAM, Systems and Processes. It is worth a total of 15 marks.

(a) (i) State the correct name of EACH of the types of drawings opposite. [2]

(ii) From the list below, state the correct name for EACH fold pictured. 3 × [1]

BARREL FOLD
ACCORDION FOLD
GATE FOLD
PARALLEL FOLD

Name: __________________________

Name: __________________________

Name: __________________________
8(b) Use drawing instruments to complete an isometric drawing of the shape below, in the space provided opposite. [4]
Sizes are approximate and should be estimated.
8(c) Complete the drawing opposite to construct an ellipse. [6]
Marks will be awarded for showing all construction lines. The construction has been started for you.
FLOWCHART

STAGES

- Does the document look as expected?
- Load printer with correct paper and click print.
- Create the document with correct fold lines and imposition.
- Score document and fold.
- Save document as a PDF (make any alterations).
- Cut out document safely.
